

INNOVATION

Four Row CRB with Stud-Type Cage

NSK's Four Row Cylindrical Roller Bearings with a Stud-Type Cage are designed to prevent cracking of rollers generated by extremely heavy rolling loads.

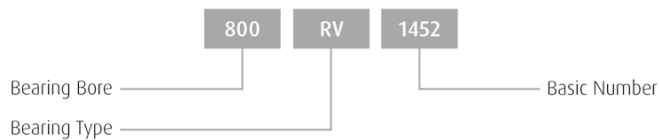

Product Features

- › Stud-type cage with solid rollers.
- › High-load capacity.
- › Higher rotational accuracy.
- › Available with NSK's special-engineered steel STF or WTF™.

Product Benefits

- › Solid-type rollers help prevent roller cracking, which can lead to emergency stoppage of the production line.
- › Better reliability under extreme operating conditions.

Condition Description:

- Heavy rolling loads
- High load capacity

Applications:

- › Steel Machinery
