

# NSK Americas Environmental Policy

*NSK Americas Environmental policy is to conduct business in a manner which protects human health, prevents pollution, and protects the environment in which the company operates.*

*Our facilities comply with applicable Federal, State and Local regulations as well as those environmental targets defined by NSK's Global Headquarters.*

*Through continual improvement, we provide Team Members the necessary guidance and training to assure they are conscious of the effects their work may have on the environment.*

*We will communicate our environmental policy to people working for and on behalf of our organization. Our environmental policy shall be posted throughout NSK Americas Facilities and made available to interested parties upon request. We encourage the same environmental stewardship and philosophy from our suppliers.*
