

Ball Screw Drives for Press Applications

Injection molding machinery driven by the electric servo produces highly accurate plastic products and machinery components. They must withstand hostile environments and operate with exceptional reliability. NSK's High-Load Ball Screws should be considered essential for every drive mechanism.

Product Features

- Higher speed
- High capacity load
- Low noise

Benefits

- Environmentally friendly use
- Minimized grease loss
- Prolonging Maintenance Intervals
- Total cost ownership reduced

Condition Description

- High Load
- High Speed
- Low Noise

Industries

- Machine Tools
