

Creep-Free Bearings Series

Creep-Free Bearings are crucial for a wide range of equipment, particularly electric motors. Tensioned O-rings mounted in the bearing outer ring improve creep prevention under rotating loads. Creep-Free offers easy assembly with the possibility of reusable housings.

Product Features

- O rings- Nitrile Rubber
- Compatible with ester oil
- Standard bearing sizes
- For use with loose housing fit
- Operating temperature -30°C to 120°C

Benefits

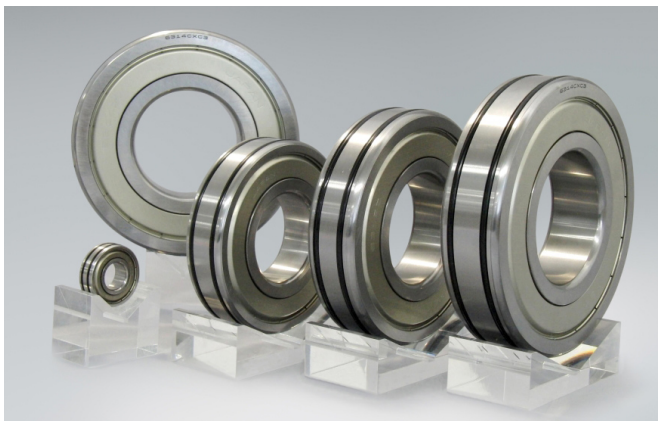

- Improved creep prevention
- Reusable housing – no reworking necessary
- Easy assembly and bearing replacement
- Cost reduction

Condition Description

- Fitting
- High Load

Industries

- Domestic Appliances
- Electric Motors
- Industrial Pumps and Compressors
- Petrochemical
- Power Tools

6203	CX	ZZ	C3	NS7S
------	----	----	----	------

Description

6203	Bearing type and series / Bore diameter
CX	Creep-Free Bearing with O-Ring
ZZ	Shields on both sides
C3	Radial Internal Clearance
NS7S	Grease type / Grease quantity
