

## Cylindrical Roller Bearings - Full Complement CRB for Crane Sheaves

Full Complement Cylindrical Roller Bearings for Crane Sheaves feature high performance seals, a highly corrosion resistant phosphate coating and overall fewer parts to improve cost performance.

### Product Features

- Improved contact seals
- High load rating
- Highly corrosion resistant phosphate coating
- Easier re-lubrication.
- Re-lubrication holes inner and outer
- Bearings pre-greased with Lithium grease

### Benefits

- Contact seals prevent ingress of foreign particles or water.
- Increased radial and axial capability.
- Re-lubrication holes for easy maintenance & grease replenishment.
- Can be used in external environments due to coating.
- Snap ring can be applied to the outer ring.

### Condition Description

- Contamination
- High Load
- High Speed
- Lubrication

### Industries

- Construction
- Material Handling
- Quarrying, Mining and Construction
- Steel and Metals
