

Linear Guide - High Accuracy HA / HS Series

High Accuracy HA/HS Series Linear Guides with outstanding motion accuracy are designed for extremely high-accuracy machine tools or measuring equipment.

Product Features

- High motion accuracy achieved adopting ultra-long ball slides
- Ball passage vibration reduced by 1/3 compared to conventional models
- Greater rail installation accuracy
- High rigidity/load capacity and low friction
- Compact design
- Load distribution in 4 directions
- Strong against shock load
- High accuracy

Benefits

- 2x's better accuracy than conventional systems
- Smooth running due to low friction
- High load capacity
- High rigidity

Condition Description

- High Accuracy
- High Load
- Low Friction
- Misalignment

Industries

- Machine Tools
- Material Handling
- Print
