

Molded-Oil Bearings

Molded-Oil Bearings are lubricated with NSK's original oil-impregnated material and are suitable for corrosive and dust-contaminated environments.

Product Features

- Maintenance free
- Stainless steel for corrosive environments

Benefits

- Molded-Oil provides continuous supply of lubrication oil
- Clean environment with grease-free property and no oil refilling
- Operating life more than twice as long as grease lubrication, in water or dust-contaminated environments
- Contact-seal type available in standard inventory for ball bearings
- Achieves extended maintenance-free performance providing continuous supply of lubricant
- Available for high speed applications
- Available in ball bearing, spherical roller bearing and tapered roller bearings

Condition Description

- Contamination
- Corrosive Environment
- Lubrication

Industries

- Agriculture
- Chemical and Pharmaceutical
- Food and Beverage
- Material Handling
- Oil and Gas
