

NSKHPS Precision Angular Contact Ball Bearings (Standard Series)

The new range of NSKHPS Precision Angular Contact Ball Bearings extends bearing life by 15% compared to conventional bearings. In addition, grease life has been improved by 1.5x's that of open-type bearings.

Product Features

- Available bore diameter from 30 mm to 100 mm
- Prepacked with grease provides easier handling
- TYN Type with ball-guided polyamide resin cage
- TR Type with outer-ring guided phenolic cage

Benefits

- up to 15% increase in bearing life
- Increased grease by 1.5x's
- Low friction
- Quiet running
- High speed performance

Condition Description

- Contamination
- Fitting
- High Speed
- Low Friction

Industries

- Machine Tools
- Semiconductor

70 13 C TYN V1V SU L P4

Description

70	Bearing type and series
13	Bore Number
C	Contact Angle
TYN	Cage
V1V	Seals
SU	Arrangement (SU: Single Universal)
L	Preload
P4	Accuracy
