

Pulley Bearings

Pulley Bearings correspond in design to a sealed double-row angular contact bearing. The outer ring is reinforced based on their function as Pulley Bearings.

Product Features

- Shields ZR: sheet steel discs
- Seals RSR: made of nitrile rubber reinforced with an embedded steel disc
- Re-greasable through the inner ring
- Outer ring can be cylindrical or crowned

Benefits

- Contact seals provide protection against the ingress of dirt, reduce wear, noise, vibration and the danger of lubricant failure
- Accomodate radial and axial forces in both directions
- Transfer of tilting moment possible
- Other bearing variants available on request: - Outer and inner ring: diameter, width, threads etc. - Contour options: crowned, gothic etc. - Special seals

Condition Description

- Contamination
- Lubrication

Industries

- Food and Beverage
- Machine Tools
