

Roller Guides - High-Performance Seal

NSK's New High-Performance Seal developed specially for ultra-fine and abrasive foreign matter delivers positive locking and wear resistance. By using new materials and a unique design, NSK has succeeded in developing an innovative seal for roller guides with lasting resistance to even ultra-fine foreign matter such as graphite or ceramic dust.

Product Features

- Extremely resistant to wear even with abrasive dust
- Outstanding seal due to positive lock around the guide rail
- Combined with a cover band
- Easy to retrofit
- Low friction

Benefits

- Prevents foreign matter from entering the guide carriage
- Extends service life

Condition Description

- Contamination
- Lubrication

Industries

- Cement
- Ceramic
- Machine Tools
- Woodworking
